

# Let`s talk about the Covid-19 Vaccine.

Some people will have the vaccine soon.

Some people will have to wait.

The vaccine will help my body fight the infection.

I can choose if I want to have the vaccine.

If I cannot decide other people can help me.  
My doctor, family, or support worker.

The vaccine is given as an injection

Into my upper arm.

After the injection I will be asked to wait  
15 minutes.

I will still have to social distance.

If I have been wearing a mask I must still  
wear one.

I can still come to The Hamlet.
